

PAYROLL

QS/1®'s Payroll system provides a comprehensive approach to managing employee payroll in government agencies. QS/1's Payroll helps you manage employee information, multiple pay types and classifications, perform what-if budget projections and create reports to monitor activities.

Payroll Budgeting

QS/1's Payroll enables you to explore the effects of salary increases and compare different percentages. You can also select individual positions for merit increases, as well as protect the budgeted amount for an open position.

Comprehensive Reporting Tools

QS/1's Payroll comes complete with dozens of standardized reports, including W2s and 941s. But the real benefit is in your ability to easily create customized reports that provide information the way you want it – without the help of an IT specialist. You can also save and export reports and data to popular off-the-shelf software.

Flexibility

A primary strength of QS/1's Payroll is its flexibility. It provides multiple ways to generate time cards, including directly from the time clock. You can also select only employees with overtime or sick days, and you can even handle them by department. The system also has the flexibility of managing up to 999 deductions or pay types, whether they are credit union, garnishments, insurance or whether they are percentages of net or a set amount.

- Maintains detailed personnel information, including photos
- Aids payroll budgeting with what-if calculations
- Provides both standardized reports and the ability to create your own customized reports
- Allows you to export data to Excel® and other popular software for customized reports
- Generates required reports such as 941s, W2s and Affordable Care Act reporting
- Provides multiple options to generate/enter time cards
- Handles up to 999 deductions or pay types
- Integrates with QS/1's Accounting Suite
- Available as an affordable cloud solution that is more easily approved
- Guides you through payroll processing with an easy-to-follow wizard
