

BUSINESS OR PRIVILEGE LICENSES

QS/1®'s Business License module enables you to stay on top of changes with local businesses. Easily track payment history and ownership, customize rates by type and receive alerts to past due taxes before renewing a license. Our customizable documents allow you to provide applications, receipts and licenses the way you want.

Business Information

QS/1's Business License enables you to maintain a comprehensive database of business information, including a history of license information and ownership without giving up flexibility in rate structures and fee types. The module also allows you to handle all of the work of a contractor through a single license. The ability to share data with other QS/1 modules, such as our Accounting Suite and Centralized Collections, expands the module's capabilities while eliminating duplicate data entry.

Information at Your Fingertips

Business License provides the information you need when you need it. Track payment history, ownership and location changes and other information using the module's dozens of standardized reports, or create customized reports to suit your needs. You can also export the data to Excel® or other popular off-the-shelf software.

Flexibility

QS/1's Business License gives you the flexibility you need to do things the way your agency needs. You can customize rates by business type and add additional fees to a license. Structure rates on flat fees, gross receipts, number of employees or any combination of types. You can even customize your own applications, receipts, notices and licenses.

Easy to Use

QS/1's products are easy to use. Wizards lead you step by step through key functions. Excellent navigation tools guide you through the system with minimal effort. Full integration of all modules provides you with a complete management solution with the same look and feel, making it easier to learn and use. Help files can be quickly accessed and training is available online, allowing you to train employees when it is convenient for you.

- Provides comprehensive database for your businesses
- Allows quick, easy access to information
- Provides history of payments and license information
- Tracks ownership and location
- Enables customized rates by business type
- Allows you to add additional fees to licenses
