

CENTRALIZED COLLECTIONS

QS/1®'s Centralized Collections software enables you to receive payments from all systems whether they are for utilities, property taxes, or a combination of payments. It also manages payments in any form – credit/debit cards, cash or check – while providing multiple levels of security to prevent fraud.

Receive Payments in One Place

Centralized Collections allows you to receive payments and provide receipts for multiple services in one convenient location. Your constituents can pay their utility bill, property taxes, business licenses and miscellaneous costs conveniently and quickly. The system also allows you to view all items that are due when entering a transaction. Payments are reflected immediately.

Flexibility

In addition to allowing payment of multiple fees and taxes, Centralized Collections helps manage payments of all types, including credit, debit and EMV/chip cards, checks and cash. You can also link two separate bills together for payment in a single transaction.

Multiple Levels of Security

Centralized Collections provides multiple levels of security to prevent fraud and provide an audit trail of transactions. You can control access with multiple and flexible security levels, and built-in tools eliminate cashier errors and unauthorized discounts. A transaction journal provides documentation of all payments and voids.

Easy to Use

QS/1's Centralized Collections is a complete collections management system with a design that lets you take advantage of time-saving touchscreen technology. You can choose touchscreen, mouse or keyboard navigation to access screens featuring large buttons and eye-friendly colors. Step-by-step wizards are available to walk you through key tasks. Centralized Collections seamlessly integrates with other QS/1 software modules.

- Provides central location to receive all payments
- Accepts payments for all services, including utilities, property taxes, licenses and other miscellaneous fees
- Manages payments by credit, debit and EMV/chip cards, checks or cash
- Alerts you to any bills due when entering a payment
- Allows you to link two unrelated bills
- Multi-level security feature prevents fraud
- Payment reflects immediately
- Support is available online or by a toll-free phone call
- Easy to learn and use
