

FIXED ASSETS

QS/1®'s Fixed Assets module enables you to maintain detailed records of your assets, including depreciation. Know where they are, when they were put into service, why they were taken out of service and everything in between. Fixed Assets integrates with other QS/1 modules and provides comprehensive reporting and documentation to make tracking assets easy and accurate.

Detailed Records

QS/1's Fixed Assets allows you to track the information you need about assets. You can record purchasing information, the vendor from whom the item was purchased, when it was put into service, ongoing depreciation, as well as when it was disposed of and why. You can even include photographs in the file.

Track Throughout Lifespan of Item

Our Fixed Assets module enables you to always know where an item is currently located. You can document transfers between departments and associate items with grants. It also allows you to classify assets by categories to simplify data retrieval.

Comprehensive Reporting

Complying with GASB 34 requirements, Fixed Assets provides a multitude of ready-made reports that give you the information you need when you need it. You also have the flexibility to create custom reports and export data to your favorite off-the-shelf software.

Easy to Use

Like other QS/1 products, our Fixed Assets module is easy to learn and use. Wizards lead you step by step through a host of key functions. Excellent navigation tools guide you through the system and help you quickly and easily access the information you need. Full integration with other QS/1 applications provides you a complete management solution with the same look and feel. Help files can be quickly accessed and training is available online, through regional workshops or onsite.

- Provides comprehensive records
- Tracks depreciation
- Allows inclusion of photographs in asset file
- Complies with GASB 34 requirements
- Maintains history of depreciation
- Allows association of asset with a grant
- Assigns tag numbers to identify items
