

INVENTORY

QS/1®'s Inventory module gives you tight control of inventory and equipment, including a complete item history. The accuracy of your inventory management is enhanced with our barcode technology, providing you with instant accountability and management of item locations. And, our comprehensive tracking and reporting enables you to access the information you need when you need it.

Inventory Management

QS/1's Inventory enables you to store the information you need on equipment and vehicles, including photos of the items. Barcode technology ensures accuracy and enhances your tracking capabilities. The module also maintains on-hand, added and removed totals for stock items, which makes auditor reports much easier. You can also establish reorder points and quantities.

Powerful Reporting Tools

QS/1's comprehensive reporting provides dozens of ready-made reports while allowing you to create your own customized reports easily without IT expertise. You can also export data for use with Excel® or other favorite software.

Easy to Use

QS/1's products are easy to use. Wizards lead you step by step through key functions. Excellent navigation tools guide you through the system with minimal effort. Full integration of all modules provides you with a complete management solution with the same look and feel, making it easier to learn and use. Help files can be quickly accessed and training is available online, allowing you to train employees when it is convenient for you.

- Stores the item information you need, including photos
- Utilizes barcode technology for greater speed and accuracy
- Provides a complete item history
- Maintains on-hand, added and removed totals for stock items
- Enables you to establish reorder points and quantities
- Accurately tracks to help prevent theft
- Comprehensive reporting includes dozens of standardized reports
